CORE COMPONENTS OF A REFERENCE

Author Rules:

1. Initials are separated and ended by a period eg Mitchell, J.A
2. Multiple authors are separated by commas and an ampersand eg Mitchell, J.A., Thomson, M., & Coyne, R
3. Multiple authors with the same surname and initial: add their name in square brackets eg Mendeley, J. [James].

Date Rules:

1. Date refers to date of publishing
2. If the date is unknown 'n.d' is used in its place eg Mendeley, J.A. (n.d)

Title Rules:

1. The format of this changes depending on what is being referenced.

Author's surname, initial(s). (Date Published). Title of source. Location of publisher: publisher. Retrieved from URL

Publisher Rules:

1. If in the US: the city and two letter state code must be stated eg San Francisco, CA
2. If not in the US: the city and country must be stated eg Sydney, Australia

This is used if the source is an online source.

BUILD YOUR REFERENCE LIBRARY

The screenshot shows the PentestGPT interface. At the top, a tab is labeled "PentestGPT: An LLM-empowered Automatic Penetration Testing Tool, Deng G, Liu Y et al. 2023". Below this, there's a sidebar with icons for "All References", "Recent", "Favorites", "My Files", "Unsaved", "Duplicated", and "Trash". A modal window titled "Start building your reference library" is open, with the text: "Use the 'Add New' menu to import files and folders. You can also **drag & drop** files from your computer directly into your library. All references you add appear in a table on this page." and a "Next" button. The background shows a table of references with columns for checkboxes, stars, authors, year, and title.

LOGICALLY TAG YOUR PERSONAL COLLECTION

The screenshot displays the PentestGPT interface. The top header shows the title "PentestGPT: An LLM-empowered Automatic Penetration Testing Tool, Deng G, Liu Y et al. 2023". The left sidebar contains navigation options: "+ Add references", "All References", "Recently Added", "Recently Read", "Favorites", "My Publications", "Unsorted", "Duplicates", "Trash", "COLLECTIONS", "Personal Collection", "Create collection", "GROUPS", "Capstone 3", "May 10 List", "Model Drift", "Shared by DrSimha", "Speech Analytics", and "Create group". The main area shows a table of references with columns for checkboxes, authors, year, and title. A modal titled "Keep your references tidy with collections" is overlaid, explaining that users can structure references by creating personal collections and sub-collections, and providing a tip to categorize materials by topic or year. The modal has "Back" and "Next" buttons.

COLLABORATE WITH GROUPS

The screenshot displays a web interface with a sidebar on the left and a main content area. The sidebar has two sections: 'COLLECTIONS' and 'GROUPS'. The 'COLLECTIONS' section includes 'Personal Collection' and a link 'Create collection'. The 'GROUPS' section lists several groups: 'Capstone 3', 'May 10 List', 'Model Drift', 'Shared by DrSimha', and 'Speech Analytics', along with a link 'Create group'. The main content area shows a list of research papers. Two blue callout boxes are overlaid on the interface. The first callout, titled 'References for personal collection', points to the first two rows of the paper list. The second callout, titled 'Groups for collaborative collection', points to the 'May 10 List' group in the sidebar.

faqs

Can I use Mendeley to cite a YouTube video or a blog?

Yes. Add it manually as a “Web Page” in Mendeley. Include the title, author/uploader, URL, and date accessed. Tag it as #video or #webresource for easy tracking.

What if I forget why I saved a particular paper?

Use the “Notes” section right when you import the paper to write 1–2 lines:

“Useful for background in Chapter 3.”

Also use tags like #LitReview, #Theory, #ToRead.

Can Mendeley tell me which papers I've already cited in my thesis?

Not directly. Best workaround: create a folder or tag like #CitedInThesis or #UsedInChapter4 as you cite papers.

Is there a way to share notes and highlights with my co-author or guide?

Yes, via a Mendeley Group. If they have access to the same PDF and annotations are shared, they can see your highlights and comments.

Can I export only a specific folder's references to BibTeX for Overleaf?

Yes. Right-click the folder → Export → Choose BibTeX. This is great for per-chapter citation files in LaTeX.

I want to highlight or comment on a figure in a paper. Can I do that?

Yes. Open the PDF in Mendeley, navigate to the figure, and drop a sticky note or highlight text nearby. Add your interpretation or action point.

Can I use Mendeley fully online without installing anything?

Yes, but with limitations. The web version is great for organizing, citing, and reading. For annotations, syncing, and full PDF features, the desktop app is better.

Will my annotations show up in Word when I cite?

No. Annotations stay within Mendeley. Use them as personal memory aids. You must paraphrase and cite manually in Word.

How do I know if I already have a duplicate of a paper?

Go to “Tools” → “Check for Duplicates.” Also avoid importing from multiple sources for the same file. Use DOIs to distinguish.

Is it okay to store confidential papers in Mendeley?

If they are under embargo or unpublished, avoid uploading to shared groups. Personal library use is generally safe but respect copyright.

Does Mendeley work well with LaTeX?

Yes. Export your library or folder as .bib and use in Overleaf. Remember to re-export if you update citations.

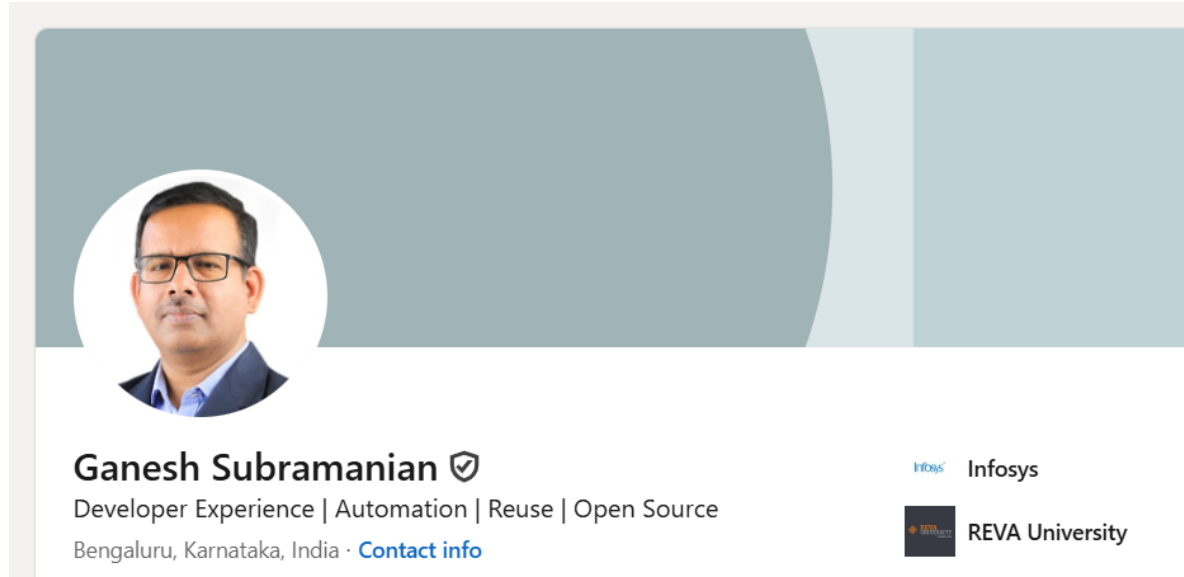

What's the best way to use Mendeley for a literature review?

1. *Create a collection like “Chapter 2 – Literature Review”*
2. *Tag papers by theme or gap*
3. *Summarize insights in the Notes field*
4. *Export .bib or cite directly while writing*
